

Bridging Worlds: The PXLLabs Vision

At PXLLabs, we're not just creating digital assets; we're pioneering a dynamic bridge between the physical and digital worlds. Our mission is to enrich both realms, making it effortless for newcomers to transition into the crypto space. By integrating real-world value with digital opportunities, we offer a unique entry point into cryptocurrency, inviting a broader community to explore, understand, and benefit from blockchain technology.

Join us at PXLLabs, where innovation meets accessibility in the exciting world of digital assets.

Introduction

Our mission is to seamlessly integrate the value generated in the physical world with the burgeoning digital asset space. The PXL Stamp Collection, comprising five distinct categories priced between 0.002 and 0.1 Bitcoin, stands at the core of this mission, offering a tiered approach to participation and benefit within our ecosystem.

Inspired by the foundational principles of Bitcoin and its creator's vision for decentralized finance, PXLLabs adopts Satoshi Nakamoto's ethos of innovation, autonomy, and privacy. Our selection of the SRC20 protocol for the PXLLabs project is testament to our commitment to these values, ensuring robustness, security, and unprunability of digital assets.

The Importance of Being Unprunable

In the digital realm, the permanence of assets cannot be understated. Unprunable technology ensures that once a transaction or asset is recorded on the blockchain, it remains indelible, immutable. This principle is core to our ethos, guaranteeing the longevity and integrity of the PXL Stamp Collection.

Choosing the SRC20 Protocol

The SRC20 protocol, a brainchild of @mikeinspace, was selected for its innovative approach to token creation and management on the blockchain. Its compatibility with the unprunable nature of blockchain transactions makes it the ideal vehicle for PXLlabs, ensuring our stamps and tokens are secure, tradable, and integrable across platforms.

Development of SRC20

We are in the process of constructing an SRC20-specific wallet portfolio function, enabling users to manage their assets without the conventional requirement of logging into individual wallets. This service aims to simplify the user experience.

The Centrality of the \$PXL Token

At the heart of our ecosystem lies the \$PXL token, a vital element that underpins transactions, rewards, and participation within the PXLlabs project. The value of the \$PXL token is inherently tied to the utility it provides, driving demand and fostering a vibrant community of users and investors.

The PXL Stamp Collection

Collection Overview:

The collection features 3141 stamps, divided into five categories that reflect their value and rarity. Each stamp serves as a key to unlocking a proportional share of revenue generated from associated physical products and services.

PXLStamps:

- Red	1111
- Orange	888
- Yellow	500
- Green	395
- Blue	147

Stamp (Share) holders gain access to revenue pools corresponding to their stamp's category, with higher-tier stamps accessing multiple pools for broader revenue sharing.

Revenue distribution

PXLlabs is committed to delivering sustainable value to PXL Stamp holders through a clear and structured revenue distribution model. This system is designed to share the benefits of our expanding ecosystem with our community, fostering a reliable passive income stream.

Monthly BTC Dividends every month, during the first week, PXL Stamp holders receive dividends in BTC. These dividends are a direct share of the revenue from our various initiatives and partnerships, reflecting our appreciation for your trust and investment in our ecosystem.

Royalty Distributions in \$PXL To further reward our community, royalties from specific projects and partnerships are paid out in PXL tokens at the end of each month. This not only provides financial benefits but also encourages deeper engagement and investment within the PXL ecosystem.

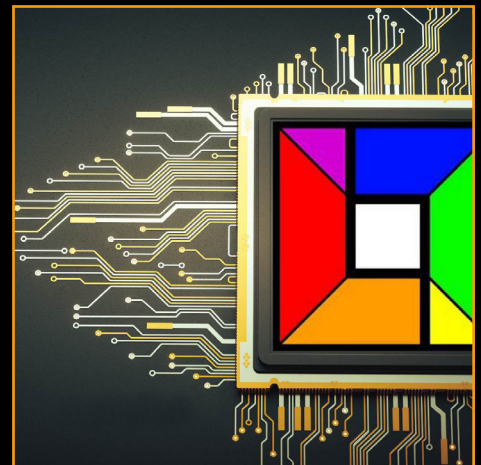

Dual payout system:

BTC dividends and \$PXL royalties, ensures that PXL Stamp holders enjoy both the stability of Bitcoin and the growth potential of \$PXL. This approach aligns traditional financial benefits with the innovative opportunities of blockchain technology, creating a robust passive income system for all involved.

Technical Architecture

Our choice of the SRC20 protocol, as the foundation for the PXL LABS project is deliberate. It offers unparalleled security, flexibility, and compatibility with our vision of an unprunable, enduring digital asset ecosystem. We are currently developing our own SRC20 marketplace, complete with a Wallet portfolio function that eliminates the need for traditional login processes, further simplifying access to the digital economy. The spirit of Satoshi Nakamoto's vision for a decentralized future, PXLlabs is not just building a platform; we are crafting a community and a culture.

By choosing innovative vehicles like the SRC20 protocol and creating a seamless bridge between the tangible and intangible, we invite everyone to join us in this journey of discovery and value creation. Together, we are not just participating in the digital economy; we are shaping its future.

Market Strategy and Engagement

PXLlabs employs a multi-faceted market strategy to promote the \$PXL Tokens and PXL Stamp collections fostering a dynamic community of collectors, artists, influencers and enthusiasts. Our engagement initiatives aim to build a vibrant ecosystem that bridges crypto enthusiasts and the broader consumer market.

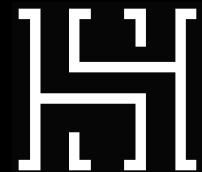

Roadmap

Our roadmap outlines the strategic milestones achieved and sets forth our ambitious goals for expanding the PXLlabs project. Future initiatives include launching new collections, forging strategic partnerships, and enhancing our platform's features.

Team and Partnerships

The PXLlabs team, comprised of seasoned professionals in blockchain, art, and marketing, is dedicated to realizing the project's innovative vision. Our strategic partnerships with artists, influencers, technology providers, and commercial brands are crucial to our future ecosystem's growth and success.' Some of our brand partners: Details will be released soon.

Legal and Regulatory Compliance

We are committed to adhering to the highest legal and regulatory standards, ensuring a secure and compliant environment for our stakeholders. This commitment is fundamental to protecting the interests of our community and sustaining the project's long-term viability.

#Conclusion

PXLlabs stands at the vanguard of integrating the physical with the digital, offering a unique value proposition through the PXL Stamp Collection. Our innovative revenue-sharing model, coupled with our commitment to community engagement and growth, positions us to lead in the evolving SRC20 ecospace.

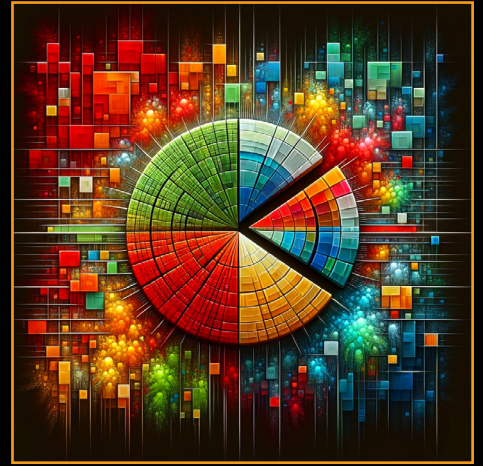

TOKENOMICS:

- 88% Community
- 6% Team / Advisors
- 4% Marketing
- 2% Airdrops

PXL Colored Pool

The PXL Colored Pool is a novel revenue-sharing mechanism that categorizes earnings based on the sale price range of physical products or services linked to PXLStamp's. These pools are named after colors (Red, Orange, Yellow, Green, Blue), each representing a specific price range. This structure allows for targeted distribution of revenue, ensuring that stamp holders receive a share proportional to their level of investment. It exemplifies the project's commitment to equitable value distribution. Allowing every participant, regardless of their entry point, to benefit from the ecosystem's success.

PXL Royalty Pool

At the heart of PXLlabs' model is the PXL Royalty Pool, which collects 88% of the profits generated from secondary market sales of PXL stamps. This pool is democratically divided among all stamp holders, granting them a continuous stream of revenue as the project's digital assets circulate within the market. This perpetual motion of value reinforces the project's ethos of shared success and collective prosperity, making every transaction within the ecosystem a tide that lifts all boats.

PXL Club

The PXL Club represents the social and educational nexus of the PXLlabs ecosystem, offering lifetime access to a wealth of experiences, learning opportunities, and networking events. The PXL Club is more than just a club. It's a vibrant community hub designed to foster connections, growth, and learning. From casual gatherings to gala events, and from introductory workshops to advanced seminars, the Club is a dynamic space that adapts to the interests and needs of its diverse membership. Whether it's through networking with potential collaborators, learning from esteemed experts, or simply enjoying exclusive entertainment, the PXL Club ensures that every member finds value, enjoyment, and unparalleled opportunities for personal and professional growth. Membership in the PXL Club is tiered, reflecting the diverse levels of engagement and investment within the PXLlabs community.

For **Red** and **Orange** Category Stamp Holders:

Lifetime Access: Holders of Red and Orange category stamps enjoy general access to the PXL Club, which includes entry to a variety of events, parties, and seminars designed to enrich their knowledge and network within the crypto and digital art spaces. This level of access opens doors to foundational educational resources, workshops on navigating the crypto world, and opportunities to connect with fellow enthusiasts and experts in less formal settings.

For **Yellow**, **Green**, and **Blue** Category Stamp Holders:

VIP Access: Yellow, Green, and Blue stamp holders are granted VIP access within the PXL Club, elevating their experience to include exclusive events, high-profile parties, and invitation-only seminars. This premium access not only includes all the benefits available to the general membership but also offers intimate networking dinners with industry leaders, private educational sessions with pioneers in blockchain and digital arts, and first-look access to new project launches. VIP members are also first to premium content, including advanced market analyses and investment strategies tailored to the discerning collector or investor.

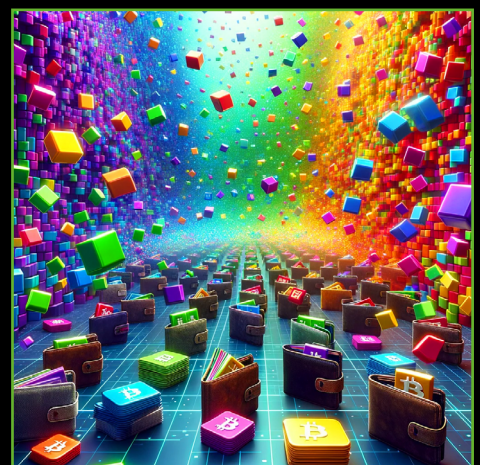

PXL Equity

PXL Equity introduces a direct link between the physical products sold and the digital realm. Holders of stamps that match one of the PXLStamps linked to a sold product receive additional revenue, acknowledging the unique connection between their digital asset and its physical counterpart.

This direct revenue stream, termed 'PXL Equity,' not only incentivizes the collection of matched stamps but also deepens the integration of physical sales into the digital ecosystem, creating a virtuous cycle of value creation and distribution.

PXL Drops

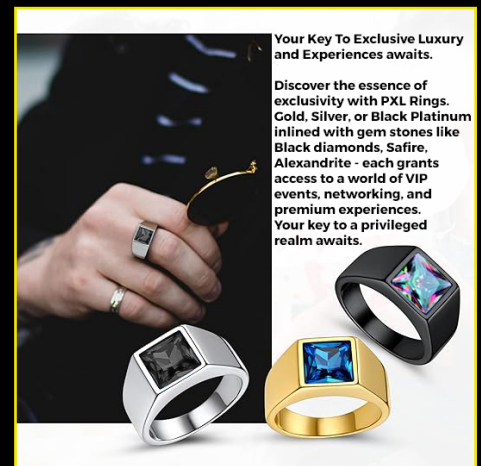

To further engage and reward the community, PXLlabs periodically conducts PXL Drops, airdropping tokens and stamps to active participants within the ecosystem. These drops serve as a mechanism to distribute new digital assets, stimulate engagement, and reward loyalty. PXL Drops are designed to surprise and delight members of the community, adding an element of anticipation and excitement to the ecosystem, while continuously enhancing the value held by its participants.

PXL Rings

Gold, Silver, and Black Platinum

Symbolizing the pinnacle of membership and participation within the PXLlabs ecosystem, the PXL Rings - available in Gold, Silver, and Black Platinum - are not just exquisite pieces of jewelry but also serve as VIP access passes to exclusive events, parties, seminars and gatherings hosted by PXLlabs and 3th parties. These rings epitomize the fusion of luxury and digital innovation, offering holders not only a tangible symbol of their status within the ecosystem but also unparalleled access to networking opportunities, luxury experiences, and community gatherings in prestigious locations around the world, including the Netherlands, Turkey, Bali, Mexico, Belgium, and for now, last but not least Ibiza. Your PXL Stamp Ring is your passport to a world where luxury, learning, and digital innovation converge. Embrace the future of digital assets with PXLlabs. Where every ring tells a story, and every holder writes history.

Your Key To Exclusive Luxury and Experiences awaits.

Discover the essence of exclusivity with PXL Rings. Gold, Silver, or Black Platinum inlined with gem stones like Black diamonds, Safire, Alexandrite - each grants access to a world of VIP events, networking, and premium experiences. Your key to a privileged realm awaits.
